Process of Accessing Mathemtica Unlimited licenses

Provided that you have downloaded and installed the Mathematica Software, the software asks for Activation keys

>> Which shows some tabs such as >> other ways to activate
>> click on Manually activate

This can be got by following steps:

- **Requesting the activation keys**

    o   Faculties can request the activation keys from the below URL :
https://user.wolfram.com/portal/requestAK/00e724cf3e0593ef4d09fdd502e7411bd08d6e34

    o   Students can request the activation keys from the below URL :
https://user.wolfram.com/portal/requestAK/37dfc537dab976ad480f36f966d900e1ed2fddad

- You have to create your own wolfram ID or continue anonymously as well but it always recommended creating and having your own Wolfram ID.
- Once you create and sign in with your Wolfram ID, you should go to My Products and Service tab which will lists certain products. If it is not depicting products, it may show a red button as: >>add Product
- Click on >>add Product and it opens up Mathematica suite for faculty members an html page
- Once you click on the Mathematica suite for faculty members an html page and it gives you an activation key.
- Once you have an activation key, paste this activation key to Mathematica activation dialog.

- **Getting the Password**

    o   Once you have entered the activation key, your machine opens a dialog & will generates MathID and asks for password
    o   The dialog shows a button at bottom as generate password.
    o   Click on generate password button which will generates the password which can be copied and pasted to password request dialog for mathematica activation.

- **Home Use Requests**
    - The home use requests can be made through the link :
